CUSTOM COLLECTIONS SEED CONDITIONING SEED INCREASES

Albright Seed Company believes that striving for the highest quality, efficient service, and competitive prices is not enough. We work as hard to achieve a relationship with our customers that is fair, honest and mutually beneficial. We're small enough to get personally involved and large enough to meet your needs. The next time you want service—call **Albright**.

Our standard terms are 2% 10 days, Net 30 days. As in any agricultural commodity market, prices are subject to change without notice. Ordinarily, our quotes are good for two weeks. If more time is needed we are often able to extend the option at our customer's request. We will refund your purchase price if the seed we ship you does not conform to the analysis tag. **Albright Seed Company** has a minimum sale amount of \$25.00 (U.S.) and restocking charge of 15% of purchase.

Albright's blends and recommendations are backed by careful evaluation, up-to-date information and constant review of performance on the job. We are aware of the need for accurate price information and firm options to buy at a quoted price. We are also able to advise on proper seeding rates, maintenance and cultural practices.

Please note that this is only a partial listing of seeds and blends available from **Albright Seed Company**. This catalog and price list is published to show the broad range of seeds and products we handle. Product bulletins and expanded lists are available on our website.

TURF BLENDS and MIXES

VISTA TURF BLEND

This blend takes advantage of top-rated **turf-type** tall fescues which retain the deep-rooted, drought-resistant characteristics of tall fescue. Vista Turf Blend produces a **durable, green, healthy** turf. It is for use in full sun or partial shade. This blend has been updated to include our dark green, fine-textured CAMARILLO Dwarf-type Fescue

- 33% Gene's Tall Fescue
- 33% Heritage Tall Fescue
- 34% Wildcat Tall Fescue

Seed: 7-10 pounds/1,000 square feet.

Emergence: 10-21 days

Establishment: 50 days

1.55 per lb.

PACIFIC VISTA DWARF TURF BLEND

Latest direction in the breeding of tall fescue. It has a shorter stature in its natural plant condition. These new fescue cultivars are known to breeders as “dwarf” tall fescue. The best of these will be in this blend. Their characteristics are darker green, finer texture, thicker turf, and slower growing habit.

- 34% Chapel Hill Dwarf Tall Fescue
- 33% Redcoat Dwarf Tall Fescue
- 33% Insignia Dwarf Tall Fescue

Seed: 10-12 pounds/1,000 square feet.

Emergence: 10-21 days

Establishment: 50 days

1.70 per lb.

FAST TRACK PERENNIAL RYE BLEND

An elite blend of 3 top NTEP rated, Perennial Ryegrass varieties. The NTEP rating provides the turf grass distributor with unbiased information on cultivar performance such as adaptation, disease resistance, insect tolerance, and environmental stress tolerance. S&S Seeds relies on this information to develop cultivar recommendations for targeted uses. Great for overseeding, this blend has been developed by a California seed company - selecting seeds for our clients needs for over 30 years.

- 34% Pearl Perennial Ryegrass
- 33% Superstar Perennial Ryegrass
- 33% Pearl II Perennial Ryegrass

Seed: 7-10 pounds/1,000 square feet.

Emergence: 7-12 days

Establishment: 60 days–(to 2nd mowing)

1.70 per lb.

FUSION DWARF FESCUE BLEND

A certified Blue Tag, Weed Free Blend of 4 top rated Dwarf Fescue varieties chosen for their fine texture dark green color and superior quality. **S&S Seeds** is proud of the turf performance of this blend. Fusion is unsurpassed in beauty and performance in California and we will keep it that way by updating the varieties that we use to make it.

- 25% Wyatt tall fescue
- 25% Chapel Hill tall fescue
- 25% Redcoat tall fescue
- 25% Jaguar III tall fescue

Seed: 8-12 pounds/1,000 square feet.

Emergence: 8-21 days

Establishment: 60 days–(to 2nd mowing)

1.70 per lb.

VALLEY FINE TURF

This mix is specifically formulated to take advantage of the third generation fine-leaf ryegrasses. It results in a beautifully uniform, fine-textured, lush green lawn. Another plus—it cuts clean to eliminate ragged tops.

- 30% AFFINITY Perennial Ryegrass
- 20% CHATEAU Kentucky Bluegrass

- 30% PS 8990 Perennial Ryegrass
- 20% Kentucky Bluegrass

Seed: 6-8 pounds/1,000 square feet.

Emergence: 8-14 days

Establishment: 50 days

1.80 per lb.

FINE LEAF PARK MIX

This mix is for use where some shade tolerance is needed. As with Valley Fine Turf, it produces a beautifully uniform turf with lush green color.

- 25% Pearl Perennial Ryegrass
- 25% Quest Perennial Ryegrass
- 25% Creeping Red Fescue
- 15% Kenblue Kentucky Bluegrass
- 10% Baron Kentucky Bluegrass

Seed: 6-8 pounds/1,000 square feet.

Emergence: 8-14 days

Establishment: 50 days

1.65 per lb.

Plush Turf Blend

This blend takes advantage of top-rated **turf-type** Tall Fescues which retain the deep-rooted, drought-resistant characteristics of tall fescue. Plush Turf Blend produces a **durable, green, healthy** turf. It is for use in full sun or partial shade.

The best all around blend for performance.

Formula blended by S & S Seed Company from three of the top ten turf type Tall Fescue varieties, rated for best performance in the following classifications.

Combines all these fine turf advantages

- *Heat & Drought: Highest tolerance available
- *Texture: Medium-fine leaf, medium –low growth
- *Superb Color: As dark as most
- *Good cold tolerance
- *Improved leaf disease resistance
- *Good wear ability: Takes use and abuse in stride

Recommended for:

- *Overseeding Bermudagrass
- *Renovation of old lawns
- *All new construction

- 34% Success tall fescue
- 33% Chapel Hill tall fescue
- 32% Pedestal tall fescue

Seed: 10-12 pounds/1,000 square feet.

Emergence: 8-12 days

Establishment: 50 days

1.40 per lb.

80/20 MIX

80/20 is a cost effective, drought-resistant turf that grows well in sun or shade. Quick recovery from injury and improved texture combine to make it the ideal mix for athletic fields or turf subjected to heavy traffic, high heat, and low maintenance.

80% Turf-type Tall Fescue

20% Kentucky Bluegrass

Seed: 8-10 pounds/1,000 square feet.

Emergence: 14-21 days

Establishment: 70 days

1.40 per lb.

OTHER TURF MIXES

SPORTS TURF PRO— A mix of FAST TRACK BLEND and BLACK JACK improved Bermuda grass. Designed for a professional turf look and performance.

65% Blackjack Bermudagrass

Seed: 10 pounds/1,000 square feet.

Emergence: 14-21 days

Establishment: 70 days

2.50 per lb.

SHADE TOLERANT

2.65 per lb.

35% SUN-UP Poa Trivialis

25% SOUTHPORT Chewings Fescue

20% WARWICK Hard Fescue

20% PS 8990 Perennial Ryegrass

**FORMULA II—80% Turf-type Tall Fescue
20% Perennial Ryegrass**

1.45 per lb

CALIFORNIA NATIVE TURF SUBSTITUTE— Native Perennial Turf, A Native Lawn substitute
So. & Central Coastal formula

Once established this is the ultimate low maintenance turf, no-irrigation and once or twice a year mowing. It is a long lived, deep rooted ground cover, that will do all of the landscape functions of an exotic turf grass with out the irrigation required.

There are some tradeoffs for this self-sustaining cover - sacrificing some color in the summer when the grasses go dormant. The plants are active in the winter when rain is expected. The ability of carefully selected California Natives to re-grow each fall from dormant crowns makes this cover Greenup faster, more forgiving, with positive protection of the soil from erosion and weeds. It should be planted before the first rains into a finely worked seedbed – may require supplemental irrigation and weed control during the first year to aid establishment.

90 % Molate Red Fescue

5 % San Diego Bent grass

5 % Achillea millefolium

Seed: 100-150 pounds/acre or 3.5 lb per 1000 sq ft

Height: 8-15 inches

Emergence: 4-15 days

Establishment: 60 days

20.00 per lb

COVER CROPS, PASTURE BLENDS AND GROUND COVER MIXES

NON-IRRIGATED

RAPID COVER (E)

A low cost, **temporary erosion control** solution or green manure plowdown cover crop. Once up, it will stabilize the soil at the surface. This saves valuable topsoil, costly repair and clean-up from runoff. It should be planted before the first rains. **Does not reseed well, but plant residuals will protect soil surface the second year and add organics to pre-amend for subsequent landscaping.**

45% Barley 45% Annual Ryegrass 10% Crimson Clover

Seed: 150-200 pounds/acre **Height:** 15-30 inches
Emergence: 4-8 days **Establishment:** 30 days **.65 per lb.**

CRITICAL COASTAL MIX

(E—an invasive exotic)

Winter annuals for highly erosive areas where **fast cover** is desired or green manure plowdown cover crop. It has been formulated with compatible grasses and the addition of field flowers to lend some color. This is a **permanent cover** which reseeds itself.

30% Cucamonga Brome 20% Zorro Fescue 10% Crimson Clover
25% California Oats 10% Common Vetch 05% California Field Flower

Seed: 50-75 pounds/acre **Height:** 15-30 inches
Emergence: 8 days **Establishment:** 30 days **3.50 per lb.**

SOIL-BUILDING MIXTURE

30% Lana Wollypod Vetch 20% Cayuse Oat 20% Common Barley
10% Hycon Rose Clover 10% Crimson Clover 10% Mt. Barker Subclover

Seed: 50 pounds/acre **\$1.50 per lb.**

LOW-GROWING LOW FUEL MIXTURE

40% Zorro Annual Fescue 15% Crimson Clover 10% Hycon Rose Clover
25% Common Vetch 10% Mt. Barker Subclover

Seed: 40 pounds/acre **\$3.75 per lb.**

GRASSLAND MIXTURE

45% Cucamonga Brome 29% Common Oats 13.3% Zorro Annual Fescue
8% Lana Wollypod Vetch 5% Hycon Rose Clover

Seed: 45 pounds/acre

\$2.60 per lb.

CALIFORNIA BIOREGIONAL MIXES

Mixes for all 11 bioregions that support the plant and animal populations in each community. The plants in each mix are of local origin or of a nature that will not displace local natives. See our web site for details.

IRRIGATED

GP PASTURE MIX

This mix provides a **general purpose** high-yielding palatable pasture. It gives uniform production throughout the seasons, stands heavy grazing, and maintains good nutritional balance.

25% Fawn Tall Fescue 10% California Brome 25% Deborah California Brome
05% Nungarin Sub Clover 15% Linn Perennial Ryegrass 05% Birdsfoot Trefoil
10% Potomac Orchardgrass 05% Strawberry Clover

Seed: 25 pounds/acre

Height: 24-50 inches

Emergence: 14 days

Establishment: 55 days

2.50 per lb.

NEAT & LOW

A colorful ground cover, this mix provides a broad genetic spread with *perennial legumes*. Perennial flowering plants have been added so that some plants will be in flower throughout the year. Best results are obtained with irrigation. **Slow to cover in winter, annual legumes and flowers can be added for faster winter cover at the expense of cleanup in early summer.**

26% White Dutch Clover 21% O'Connors Strawberry Clover
21% Salina Strawberry Clover 16% Birdsfoot Trefoil
16% **ALBRIGHT'S GARDEN FLOWERS**

Seed: 50-75 pounds/acre

Height: 5-24 inches

Emergence: 14-21 days

Establishment: 50 days

7.00 per lb.

MEADOW VIEW

A low, slow-growing mix of grass, legumes and flowers for that suburban meadow look. Provides low growth and color splashes for areas where the low, unmowed look is preferred.

92% Hard Fescue

03% New Zealand White Clover

05% **ALBRIGHT'S GARDEN FLOWERS**

Seed: 50-75 pounds/acre

Height: 18-24 inches

Emergence: 12-21 days

Establishment: 80 days

6.00 per lb.

INSECTA-FLORA MIX (E)

Wildflower Cover Crop Mix for commercial orchards. Creates a beautiful natural habitat for beneficial insects to reduce pesticide use.

Seed: 11 pounds/acre

\$26.00 per lb.

Also Available (covers 5,000 sq. ft):

\$29.95 per 1.25 lb. bag

PERENNIAL GRASSLAND MIXTURE

40% Idaho Native Fescue

40% Molate Native Fescue

10% Strawberry Clover

10% Insecta-Flora Wildflowers (see Insecta-Flora Mix)

Seed: 20 pounds/acre

\$15.00 per lb.

Cover crops enhance the beauty of vineyard or orchard while attracting beneficial insects, keeping dust down, reducing need for pesticides, cultivation, fertilizer and water. Both our non-irrigated and irrigated mixes can be custom blended for specific sites and farm practices .

A—Annual; P—Perennial; BI—Biennial; E—Invasive Exotic; NC—Endemic native to one or more California bioregions; NS—Native to Southwest U.S.; NN—Native to North America. Rates per acre if seeded alone. Available in other colors. Species marked “E” are listed by the California Native Plant Society as invasive exotics that should not be used outside of managed landscaped areas or near native open space without careful consideration as to their adaptability in that zone. Species marked "NC" are endemic natives to one or more California bioregions.

RECOMMENDED GRASSES

To lend a natural balance to a meadow, include one of our selected grasses with your wildflower mix. Check **Erosion Control, Ground Cover, Pasture** grasses identified with *.

WILDFLOWER MIXTURES

CALIFORNIA FIELD FLOWERS ANNUAL WILDFLOWER MIX

These robust species compete well with existing grasses—good news for large open areas where weed control is difficult. Designed as a non-irrigated mix to be seeded in the fall. May be irrigated to establish growth and to prolong the blooming period. Mostly annuals for good first-year color.

Height: 3 ft.

20.00 per lb.

MADE IN THE SHADE WILDFLOWER MIX

This wildflower mixture was designed for shady areas with at least a few hours of sunlight.

Height: 3 ft.

36.00 per lb.

THE COUNTRY COTTAGE CUTTING GARDEN MIX

Here is a balanced blend of annuals and perennials including all the old-fashioned favorites of yesteryear. Has the advantage of also being a CUTTING GARDEN for good color and varied bouquets. Once established, this mix requires good irrigation. If possible, soak the ground, rather than use overhead sprinklers, and ensure good weed control.

Height: 4 ft. or more

32.00 per lb.

MARVIN GARDENS

This low growing annual and perennial wildflower mixture reaches only 1-2 feet in height. A sophisticated blend that can substitute for the beauty of a meadow in a small area. Use as a border for any unused portion of the garden.

Height: 1-2 ft.

30.00 per lb.

HIGH DESERT FLOWER/SHRUB MIXTURE

Control wind erosion by providing a ground cover that blends with the native chaparral. Mostly annual flowers for first year color plus quick-establishing perennials, all needing only one mowing a year. Plant in the spring, irrigate the first summer to establish. Additional irrigation will prolong the blooming period. To be added for aesthetic balance: Achnatherum speciosum, Desert Needlegrass

Height: 3 ft.

28.00 per lb.

CALIFORNIA CENTRAL "BIG VALLEY" WILDFLOWER MIX

Here are selected flowers for a wonderful show of spring and summer bloom in the central valley area where temperatures can be extreme. A balanced blend of drought-tolerant annuals and perennials from California natives to some introduced species that are very adaptable to hot, dry conditions. Suitable for non-irrigated areas if seeded in the fall with some weed control.

26.00 per lb.

ALPINE FLOWER MIX

Enhance any mountain view with a rich variety of wildflowers.

This balanced blend of annuals and perennials was designed for success in the higher elevations of California.

Height: 3 ft.

32.00 per lb.

BLANKET OF COLOR GROUND COVER MIX

A balanced blend of compact annuals and perennials provide a continuous color show with low maintenance. Warm shades of yellows, golds, orange, some reds, all embraced in white. The BLANKET OF COLOR will create depth where space is limited, with variety for interest at close inspection. Low enough to function as a lawn or as a permanent ground cover.

Height: 6-12 in.

36.00 per lb.

ALBRIGHT'S PERENNIAL GARDEN FLOWER MIX

Primarily perennial flowering ground cover. Use where low-growing color is desired. Designed to be irrigated for maximum profusion; with preplant weed control. Sow anywhere in California below 3,000 ft. Some annuals have been included for rapid cover and first-year color.

Height: From 1 to 3 ft.

35.00 per lb.

COASTAL NATIVE WILDFLOWER MIX

There are many species available native to the Pacific coastal range. Under the influence of the Pacific's low-lying clouds and very little frost, this mix blooms in rich color contrast spring through late summer. Succeed with wildflowers native to your area and become familiar with these representative specimens for the meadow or garden border. For aesthetic balance add optional grasses.

Height: From 6 in -4 ft.

28.00 per lb.

Acacia redolens—Prostrate Wattle	35.00
Acacia salinga—Blue Leaf Wattle	24.00
Adenostoma fasciculatum—Chamise	20.00
Artemesia californica—California Coastal Sage	22.00
Atriplex glauca—Gray Saltbush E	15.00
Atriplex lentiformis—Quail Bush	9.00
Atriplex semibaccata—Australian Saltbush E	16.00
Baccharis pilularis—Coyote Bush	22.00
Chrysothamnus nauseosus—Rabbit Bush	9.00
Cistus villosus—Rock Rose E	44.00
Encelia californica—Bush Sunflower	40.00
Encelia farinosa—Brittlebush	15.00
Eriogonum cinereum—Ashy Leaf Buckwheat	15.00
Eriogonum fasciculatum—California Buckwheat	3.00
Eriophyllum confertiflorum—Golden Yarrow	40.00
Isocoma menziesii—Golden Bush	30.00
Heteromeles arbutifolia—Toyon	12.00
Lotus scoparius—Deer Weed	12.00
Lupinus arboreus—Bush Lupine	25.00
Mimulus longiflorus—Southern Monkey Flower	45.00
Mimulus puniceus—Red Monkey Flower	35.00
Rhus integrifolia—Lemonade Berry	15.00
Rhus larina—Laurel Sumac	19.00
Salvia mellifera—Black Sage	40.00
Viguiera laciniata—San Diego Sunflower	27.00
Yucca whipelii—Our Lord's Candle	35.00

OTHER PRODUCTS FROM ALBRIGHT

SOIL BINDERS

SENTINEL

Sentinel is a concentrated *hydrophilic colloid* derived from seed husks. Sentinel is organic and biodegradable and is nontoxic even at high application rates. Application of 90/100 lbs. per acre with 1,500/3,000 gallons of water is the standard rate using hydraulic seeding equipment.

1.00 per lb.

ASB-45 Acrylic Copolymer

Dust control for traffic or non-traffic areas. Application rates on request. Approved by CALTRANS and other governmental agencies.

350.00 per drum

MULCHES

FIBER MULCH

HYDROSEED MULCH 100% Paper Mulch The ecological alternative—100% recycled newsprint and paper. Cleanest with lowest moisture content in the industry. In 50 lb. bales. **10.00/bale**

TOP DRESSING

Bed Spread Pellet Mulch A manual top dressing.

Coverage rate: 50 lb. bag per 200 sq. ft.

6.00/bag

Truckload of any of above mulches: Call for quote

GEOTEXTILES

Poly Burlap

Close mesh polypropylene netting offers better control than conventional jute/burlap on slopes and retains moisture. **.15 per sq. ft.**

PRO 5 Weed Barrier

Our best quality in 6-ft and 12-ft widths. Keep water in, weeds out. **.10 per sq. ft.**

Other geotextiles available. Call **Albright** for information and prices.

STORMWATER RUNOFF CONTROL

BIO-FILTER BAG

Ecologically sound alternative to straw or sand bag barriers for control of stormwater. Mesh bags filled with 100 percent recycled wood chips to hold back entrained soil silt and debris. Degrading wood chips add mulch to soil to avoid costly labor-intensive sand and straw removal with other barriers.

18 X 42 in. mesh bag **3.00 ea**

FERTILIZERS

[Compost for Hydroseeding](#) The perfect solution for erosion control and revegetation. Retains water. Enhances germination, bio activity and nutrient uptake for quick establishment. Use with paper or wood mulch. Uniform texture and size for spray application. 45 lb., 1 cu/ft bags; 60 bags/pallet.

1-5 pallets	300.00/pallet	FOB Albright Locations.
6-10 pallets	280.00/pallet	FOB CA Job Site
11-20 pallets	270.00/pallet	FOB CA Job Site

BIOSOL 6-1-3 California Certified Organic Fertilizer. Special blends for Northern or Southern California.

55 lb. bag **26.00/bag**

BIOSOL MIX 7-2-3 Natural Organic Fertilizer. **PROVEN MORE EFFECTIVE IN REVEGETATING** low-organic subsoils.

55 lb. bag **22.00/bag**

MICROBIAL INOCULANTS

PROMOT PLUS

A natural plant growth promoter that contains living microorganisms, enzyme complexes, and nutrients that improves standard establishment rates, increases crop yields and improves plant disease resistance.

80.00/gallon

TURBOSTART Biological Alternative for the Future

Increases absorption of minerals and nutrients, intensifies plant development and survivability and disease resistance. Promotes drought tolerance, nitrogen fixation, tolerance to salts. Reduces fertilizer, material and labor costs. A mixture of endomycorrhizal spores, host plant roots and sterilized soil media. Primarily composed of mycorrhizal fungi, *Glomus etunicatum* and *Glomus intradicies*. Includes *Trichoderma* and *Cytokinin* organisms to increase biological activity and regulate growth.

80.00/gallon

PLANTING SYSTEM

RACING JACKET

[RACING JACKET](#) gives turf and other plantings from seed a head start that results in quick establishment of healthy, vital plants. RACING JACKET is specially formulated to help:

- increase nutrient and water absorption
- reduce transplant shock
- increase tolerance to environmental stress such as drought and salinity
- increase root biomass
- decrease need for phosphate fertilizers
- increase availability of certain elements, particularly calcium, copper, iron, phosphorus, manganese and potassium.
